FLUSH TRIM SPIRAL BITS

Up Cut, Down Cut, or Combination
Solid Carbide - Two Flute

PART # RFTD1600

PART # RFT5125

These spiral bits offer State-of-the-Art results in Flush trimming. Our 1/4" diameter tools are great for small inside corners. Try our 1/8" diameter for extremely sharp corners. The 1/8" bit uses a solid pilot. All others feature a double ball bearing guide. Available in your choice of Up Cut, Down Cut, or an Up/Down Combination.

CT STRAIGHTS

CNC ROUTER BITS

Straight Cut - Carbide Tipped

PART # C7525F

CNC Tools are designed to meet the severe applications of CNC routing. These tools offer superior performance over standard straight flute bits at the high feed rates commonly found on CNC routers. They also provide an economical alternative to the more expensive spiral bits. For the ultimate in CNC routing, choose from Whiteside's wide selection of Solid Carbide Spiral Bits listed on pages 2 and 3.

**** Use on CNC Routers only.**

Part Number	Cutting Diameter	Cutting Length	Overall Length
1/2" SHANK • SINGLE FLUTE			
C1052	1/2"	1 1/4"	2 7/8"

1/2" SHANK				
3016	1 1/8"	1"	3"	B11
3018	1 1/8"	1 1/2"	3 1/2"	B11
3019	1 1/8"	2"	4"	B11
*** 3020	3/4"	1"	2 3/4"	B19
*** 3021	3/4"	1 1/4"	3"	B19
*** 3022	3/4"	1 1/2"	3 1/4"	B19
*** 3023	3/4"	2"	3 5/8"	B19

* Dado Clean out bits. Use to Square the bottom of dado cuts made on a table saw.

*** Whiteside recommends the 1 1/8" dia tools in the 1/2" shank whenever possible due to the fragile nature of the B19 bearing.

STAGGERTOOTH • MORTISE

STAGGERTOOTH BITS

Straight Flute

PART # 1202

Part Number	Cutting Diameter	Cutting Length	Overall Length

B3 Bearing supplied.

*Proper Size for Biscuit Joining

BB501 - Bearing Kit with Wrench (see pg. 35). Increase the versatility of your Rabbeting Bits by simply changing the bearing size to vary your cutting depth. This set allows 1/4", 5/16", 3/8", & 7/16" cutting depth on all 1 1/4" bits or 3/8", 7/16", 1/2", & 9/16" cutting depth on all 1 1/2" bits.

BISCUIT JOINING KIT

This kit contains our 5/32" Rabbeting Bit with 1/2" B3 bearing for cutting slots to fit #20 Biscuits. Also includes alternate bearings B14 and B15 to cut slots for #0 and #10 Biscuits. Hex Wrench included.

Part Number	Description
1940	1/4" shank kit
1945	1/2" shank kit

MULTI RABBET SET

Change your Rabbet depth by changing the bearing! Set includes all eight bearings to make each of the cuts shown. Hex Wrench included.

Set Number	Large Diameter	Cutting Length	Description
1952	1 3/8"	1/2"	1/4" Shank Set
1955	1 3/8"	1/2"	1/2" Shank Set

Sets are organized and protected in 4" x 4" x 3" Box.

DEEP MULTI RABBET SET

Our largest Rabbet Bit in a set with five bearings. Makes those extra deep Rabbet cuts as shown. Hex Wrench included.

Set Number	Large Diameter	Cutting Length	Description
1960	1 7/8"	1"	1/2" Shank Set

Sets are organized and protected in 4" x 4" x 3" Box.

ROUND OVER

ROUND OVER BITS

Small Pilot

PART # 1982

GREAT FOR
TIGHT
PLACES

Extra Small Brass Pilot (5/32" dia.) allows these bits to roundover edges on finely detailed workpieces with intricate contours, tight confines, and narrow openings. These bits give professional results without all the tedious hand sanding. Carbide cutting edges far outlast comparable high speed steel bits.

Part Number	Radius	Large Diameter	Cutting Length	Overall Length
1/4" SHANK				
1978	1/16"	3/8"	7/16"	2"
1980	1/8"	3/8"	7/16"	2"
1982	1/4"	5/8"	1/2"	2 1/8"
1984	3/8"	7/8"	5/8"	2 1/4"

MULTI-BEADING SETS

For extra deep beading

PART # 2042

R-OVER

1/16 BEAD

1/8 BEAD

3/16 BEAD

Roundover and More! Conventional Beading only cuts a shallow 1/16" bead. Expand your capabilities with these versatile sets. Deeper beads create a more pronounced edge on larger pieces. Includes all four bearings and Hex Key Wrench.

Part Number	Radius	Large Diameter	Cutting Length	Overall Length
1/2" SHANK				
2040B	1/4"	1 1/4"	1/2"	2 3/8"
2042B	3/8"	1 1/2"	5/8"	2 1/2"
2044B	1/2"	1 3/4"	3/4"	2 5/8"

LAMINATE TRIMMERS -

WITH   Square Bearing

Here's a Square Deal! A quality Whiteside Trim Bit with the exclusive Euro Square Bearing. How does it work? The square bearing stops spinning as soon as it touches the workpiece. Then the side of the square simply slides along the workpiece edge - building up more glue and residue with every revolution. Plus, the square is made from non-stick Teflon®, so it wipes clean easily and it won't mark your workpiece. If you cut laminates, you need to try this bit.

PART # 2640

PART # B3SQ

PART # 2660

PART # B8SQ

Part Number	Cutting Diameter	Cutting Length	Overall Length	Bearing Number
1/4" SHANK				
2640	1/2"	1/4"	1 5/8"	B3SQ
2650	3/4"	5/8"	2 1/4"	B8SQ
1/2" SHANK				
2660	3/4"	5/8"	2 1/4"	B8SQ

These bits are designed with a slight taper on the cutting diameter. This allows up or down adjustment to achieve an exact blend - even after resharpening.

Square Bearing

PART # B3SQ

PART # B8SQ

Replace the standard 1/2" B3 bearing found on most of our Edge Form bits with the B3SQ square bearing if residue build-up on the bearing or marring of the workpiece is a problem.

Recommended for solid surface applications. B3SQ is 1/2" square. B8SQ is 3/4" square. Both are standard 3/16" inside diameter.

3390	5/16-1 1/4"	1 3/8"	5/16"	3 1/4"

Bearing Number: B4

MULTI SIDE BITS

A great way to join up many multi-side projects (planters, columns, barrels, etc.). Very straightforward, this joint requires routing a notch in only one edge of each stave (side). Notching also improves ease of assembly and total glue area. All bits are 1/2" shank and are designed for use in a router table with a fence guide.

Part Number	Number of Sides	Stock (Maximum)	Large Diameter
1/2" SHANK			
3506	6 or 12	7/8"	1 7/8"
3508	8	7/8"	1 3/4"
3516	16	1"	1 5/8"

On six and eight sided objects, the exterior side is cut face up on a router table. Twelve and sixteen sided objects are cut face down. The same bit (#3506) is used for six sided and twelve sided objects.

Either Flush or Ribbed (outside corners protruding) construction is possible. Ribbed construction is recommended with 12 and 16 sides because the interior leg of the notch will be very small when made flush. Outside corners on ribbed construction can be cut or sanded down for flush appearance if desired.

Location of the inside corner of the notch (i.e.- vertical bit adjustment) is important for final finish appearance. The outside leg of the notch (closest to the exterior) should be the same length as the stock thickness for flush construction. This will put the inside corner of the notch in the center of the stave on six sided flush projects. The inside corner will be below center (furthest from exterior side) on all others. Allow extra stock to experiment and set corner height as desired. Move notch towards exterior side (raise the bit) to increase rib size (amount of outside corner protruding). Move notch away from exterior side (lower the bit) to decrease amount of rib. Note: Bit adjustment is reversed on twelve and sixteen sides since those staves are cut face down.

TONGUE & GROOVE ASSEMBLY

Part Number	Material Thickness	Large Diameter	Tongue Width	Bearing

Replacement Parts: Groover - 3375G
Arbor - A260

USING THE TONGUE & GROOVE ASSEMBLY

Cutting the Tongue

Cutting the Groove

GROOVE PROFILES

Small Grooving Bits are commonly used for decorative designs in cabinet doors or for detail veining in furniture. Round Nose Bits (pg. 9) and V-Groove Bits (pg. 10) are often used in the same manner. The Larger Grooving Bits are great for a raised panel effect in doors and for adding a bold accent to furniture or large workpieces. These bits also make nice edge profiles with the aid of a router table and fence.

These bits are ideal for adding bearings to the shank for following templates. Select a bearing from page 35 with the same inside diameter as your shank size. Outside diameter should be the same size or larger than the large diameter of your router bit. Secure bearings with a lock collar. Use Lock Collar #LC-1/4 for 1/4" shanks or LC-1/2 for 1/2" shanks.

MDF DOORS

The Tooling on this page is designed to give the illusion of raised panel door construction in MDF and solid panel doors. These bits, when used individually, produce a nice simple raised panel effect in one pass. Or use one of the "Panel" bits in conjunction with one of the "Stile" bits to create a more authentic raised panel reveal. Many different combinations are possible. See Bottom of Page.

Although designed for production routing on solid door machines and CNC routers, the addition of a bearing to the shank will allow the hobbyist to cut his pattern by following an edge guide. The guide can be four strips clamped around the perimeter of the door. The top strip may be curved for an arched pattern. Follow the guide and rout both profiles. There's no need to move the guide for the second cut. A larger bearing on the panel bit takes care of the offset. Use **Bearing #B16 for the Stile bits and Bearing #B24 for the Panel bits. Secure the bearings to the shank with a #LC-1/2 Lock Collar (see pg. 35).** When making the second cut, match the depth setting of the first cut to obtain a pattern with a flat bottom – Or vary the depth to add an extra distinctive "step" in the bottom of your reveal. Complete the door by adding a door edge pattern (see Pg. 29) around the outside edge.

PLYWOOD PANEL STILE & RAIL

This set-up is for cabinet door construction with undersized $1/4"$ plywood panels. (Actual panel thickness of $7/32"$ or 5.5 mm). Whiteside's **conversion kit #6000X** converts the regular full size Stile and Rail Bits to the narrower groove required for these plywood panels. This kit gives you the flexibility to do either plywood panels or raised panels. Plus, it can be used on any Whiteside full size Stile and Rail bits that you may already own.

Our two most popular Stile and Rail sets are also available ready to use just for plywood panel construction. Order Part Number **6001X** for round pattern or Part Number **6002X** for ogee pattern. $1/2"$ Shank only.

RAISED PANEL

MINIATURE RAISED PANEL BITS

1 3/4" Diameter - 1/2" Shank
Ball Bearing Guide

These raised panel bits offer a reduced pattern ideal for smaller projects. Available in your choice of cove or ogee profile shown below. To work with the miniature stile and rail bits, set bit depth to leave a 5/32" thick tongue. Leaves only a 3/8" panel reveal after assembly! Now you can use raised panel construction for small doors, chests, jewelry boxes, etc.

MEDIUM RAISED PANEL BITS

2 1/2" Diameter - 1/2" Shank
Ball Bearing Guide

These bits cut a 1" wide pattern and are often used for general edge profiles in addition to raised panels. They can be used with the miniature or the full size stile and rail bits. See our great selection of profiles available at left.

LARGE RAISED PANEL BITS

5900 Series - 2 wing - 3 1/4" Diameter
6000 Series - 3 wing - 3 3/8" Diameter
1/2" Shank - Ball Bearing Guide

LARGE RAISED PANEL BITS with BACK CUTTER

2 wing (2+2) - 3 1/4" Diameter
1/2" Shank - Ball Bearing Guide

This Panel Bit with Back Cutter allows you to cut the Front Reveal and the optional Back Cut at the same time - and guarantees a 1/4" tongue in the process.

CABINET DOORS

RAISED PANEL DOOR CONSTRUCTION

Choose stock size as appropriate for your project. For example, 3/4" x 2" stile & rails and 5/8" thick panels (without optional back cut) are common for cabinet doors. Use your stock size and door size to calculate the following:

Stile length = Door height

Rail length = Door width - width of both stiles + Interlock

Panel height = Door height - width of both rails + Interlock - Expansion

Panel width = Rail length - Expansion

Interlock = 3/4" (3/8" per side) on Whiteside full size Stile & Rail bits or

1/2" (1/4" per side) for Whiteside miniature Stile & Rail.

Expansion: Generally 1/8" on cabinet doors. Can vary with door size, green condition of wood, anticipated exposure to high humidity, and species of wood.

Use the Stile bit to cut the entire length of the inside edge on both the stiles and the rails.

Use the Rail bit to make the matching cross grain end cuts on the rails only.

Use the Raised Panel bit to cut all four sides of each raised panel face down on the router table. Set Raised Panel bit height for proper tongue thickness. Tongue should be 1/4" for the full size Stile & Rail bits or 5/32" for the miniature ones. Allow extra stock if you plan to use the optional back cutter.

Use the Standard Glue Joint (page 22) or biscuits for added strength when gluing up larger panels.

Cut all components and test fit. Then glue up and reassemble. Glue only the stile and rail joints. The panel should be allowed to "float" to allow for expansion and contraction. You may choose to use anti-rattle snakes to prevent the panel from rattling. Make your own by running a 1/8" bead of 100% silicone caulk on wax paper. Allow to dry. Cut into pieces about 3/4" long. Insert in each groove at every corner while assembling. Check the door for squareness immediately after gluing up. It may also be helpful to pre-stain the raised panel because part of the concealed portion of the tongue may become visible later due to contraction. Complete the door by adding a door edge pattern (page 29) around the outside edge.

RAISED PANEL BACK CUTTER

This bit offers a safe and economical way to make that optional backside cut on raised panels. It is suitable for use with any of our Raised Panel Bits on page 27. 1 3/4" large diameter with 1/2" shank. Order part #5850.

VERTICAL PANEL BITS

1" Diameter - 1/2" Shank

1 1/2" Cut Length

Vertical Panel Bits offer a method to cut full size raised panels with a smaller router bit requiring less horsepower. These bits are usually run in a router table with the panel standing on edge and the face of the panel against the fence. Fence must be tall enough to properly support the panel. Use on straight sided panels only since there is no bearing guide for arched or cathedral style doors.

STILE & RAIL GLASS DOORS

Make the Stile & Rail cuts for glass doors using Whiteside's full size Stile & Rail Sets on page 26. No extra components are required. All that's needed is to stagger the cutting edges and "stack" both groovers on the Stile bit. Use both bearings (no groover) on the Rail bit. See Drawing. Now make your cuts just like in normal door construction - Cut the inside edges of all four pieces with the Stile Bit. Trim the ends of the Rails with the Rail bit. Assemble door and insert glass pane. Use clips or corner trim mold on the back side to hold the pane in place.

DOOR & DRAWER EDGE

6016	1 5/8"	15/16"	Reversible

DOOR EDGE BITS

Front Face Edge

Ball Bearing Guide

3290 & 3292

6020

PART #6020

6021

6022

6023

These bits cut a decorative profile along the front face of the door edge while leaving most of the edge straight. Their shallow design works well with concealed European style cup hinges. Many of our other edge profile bits (pg 18-19) also make great door edges. (Deeper profiles may not be compatible with European style cup hinges).

Part Number	Large Diameter	Cutting Length	Overall Length
1/4" SHANK			
3290	1 3/8"	3/8"	1 7/8"
1/2" SHANK			
3292	1 3/8"	3/8"	2"
6020	1 9/16"	3/8"	2 1/4"
6021	1 3/4"	3/8"	2 1/4"
6022	1 3/4"	3/8"	2 1/4"
6023	1 3/4"	3/8"	2 1/4"

DRAWER PULL - EUROPEAN STYLE

PART #6024

6024

6026

ACTUAL SIZE

Part Number	Large Radius	Large Diameter	Cutting Length	Overall Length
1/2" SHANK				
6024	3/16"	3/4"	7/8"	2 3/8"
6026	1/4"	1 1/2"	13/16"	2 3/8"

DRAWER EDGE FINGER PULL

Produces a nice smooth finger grip primarily used on the bottom edge of drawer fronts. Also used as a finger pull on cabinet doors where no edge pattern is needed on the front face.

PART #6032

6032

Part Number	Large Diameter	Cutting Length	Overall Length
1/2" SHANK			
6032	1 1/4"	3/4"	2 1/2"

Bearing Number: B3

WINDOW SILL EDGE/FINGER PULL

Originally designed to cut the front edge of window sills, this bit has also become popular for making a rounded finger edge on both drawers and door edges. Use with a router fence or add a shank mounted bearing for following a straight edge or template.

PART #6046

6045

ACTUAL SIZE

6046

Part Number	Radius	Large Diameter	Profile Length	Overall Length
1/2" SHANK				
6045	7/32"	1 1/4"	13/16"	2 7/8"
6046	3/8"	1 7/16"	1 1/8"	3 3/8"

Use Bearing (B16 for #6045, B18 for #6046) and Lock Collar (LC-1/2) on Shank for Template Work.

WINDOW SASH • DOVETAIL SETS

WINDOW SASH

This is the only bit you need to make a complete window sash. The bearing guide controls the pattern depth and also allows you to make arched or curved windows and glass doors.

This assembly with the straight end cutter cuts the inside edges on both the stiles and rails. Convert the assembly to make the mating end cut by exchanging the straight cutter for the spacer (see drawing. The spacer can be installed between the profile cutter and the shank if additional reach across the workpiece is needed.) Now make the mating end cuts on the rails. This bit can also be used to cut both the decorative edges and the mating end cuts required to make your own window mullions (crosspieces).

Part Number	Cutting Diameter	Cutting Length	Overall Length
6050	1 3/8"	7/8 - 1 5/8"	3 5/8"

Replacement Parts:
 Arbor: A380
 Bearing Number: B5
 Profile Cutter: 6050H
 Straight Cutter: 6050G
 Spacer: 6050SP

AKEDA DOVETAIL BITS

AKEDA
APPROVED

Whiteside offers USA quality bits made to Akeda's specifications for the Akeda Dovetail Jig. Available individually or in a complete set. All 1/4" Shank.

Part#	Description
Individual Bits	
DA7-438	Akeda 7° Dovetail Bit
DA9-438	Akeda 9° Dovetail Bit

INCRA DOVETAIL SETS

Top Quality Dovetailing Sets for use with the popular Incra System. Choose the #D101 Set (1/4" Shank) for the smaller Dovetails (1/4", 3/8", 1/2", 17/32"). Take the #605 Set (1/2" Shank) for the heavier 3/8", 1/2", 5/8", & 3/4" Dovetail bits. Both Sets also include the 1/4" and 3/8" Box Joint Bits.

Part#	Description
D101	6 Piece Incra Set - 1/4" Shank
605	6 Piece Incra Set - 1/2" Shank

All bits available individually. See next page.

LEIGH DOVETAIL SETS

Upgrade to Whiteside Quality USA Bits for your Leigh Jig. The smaller bits are supplied in the recommended 8mm Shanks (1/2" Adapter Collet is included). The largest sizes come in 1/2" shanks. Improved Performance Guaranteed.

Part#	Description
D108	7 Piece Leigh Set. Includes D8-437x8, D8-687, D14-51x8, D18-50x8, 1020x8, 1067, and 6400x8 Adapter.
D116	6 Piece Leigh Set for #D1600 16" Jig. All bits 8mm Shank. 6400x8 Adapter Collet to 1/2" is included. Complete with the following bits: 1020x8, D8-375x8, D8-500x8, D14-51x8, D18-50x8.

All bits available individually. See next page.

WHITESIDE BORING BITS

Whiteside Machine Company's Carbide Tipped Boring Bits feature a centering point and two carbide spurs to eliminate tear out. The 2 1/8" diameter bit is used mostly for door knob holes. The 35mm diameter bit is widely used for European style cabinet door hinges. Made in USA.

*** Use in drill press or boring machine. NOT for use in routers.

Part Number	Cutting Diameter	Shank Diameter	Overall Length
6100	2 1/8"	1/2"	6 1/8"
6140	35mm	3/8"	2 3/8"

** Use only in drill press or boring machine.

FACE FRAME COUNTERBORES Carbide Tipped

Part Number	Counterbore Diameter	Pilot Diameter	Length	Type
3/8" SHANK

FF301SP	3/8"	.136	4"	Spiral Flute
FF302	3/8"	.136	6"	Long
FF303	Replacement	.136 Pilot Fishtail Drill Bit (HSS)		
FF304	Replacement Set Screw	Uses 5/64 Hex Key		

Standard Type fits Unique, Norfield, Evans, Ritter, and Marcon face frame boring machines.

Long Version is for use on drill press.

ACCESSORIES

9500 - SOLID BRASS INLAY KIT

Whiteside's brass inlay kit allows you to make perfect fitting inlays for decoration or repairs. Simply cut your template from 1/4" thick material and trace it with your router to cut both the cavity in your workpiece and the matching inlay to be inserted. Instructions are included. Our kit includes a special centering pin to insure exact alignment with router spindle. Also includes a 1/8" Solid Carbide Spiral Router Bit (Part# RD1600).

9510 - BASE PLATE REDUCERS - SOLID BRASS

These solid brass inserts fit into your router base plate to reduce the gap around the router bit. Not only is this safer, but it also reduces tearout and helps support smaller workpieces. Supplied in a set with openings of 1/4", 3/8", 1/2", 5/8", 3/4", 7/8", and 1", plus retaining nut. Openings are slightly oversize for tool clearance. Fits any router with a standard 1 3/16" diameter recessed hole for template guides.

9600 - SQUARE CORNER CHISEL

Use this tool to square up the round corners left behind when routing hinge mortises. Hold unit in mortise corner and strike with hammer. Our chisel features a sharp 3/8" square hardened steel cutting blade. Made in USA by Whiteside Machine Company.

QUICK CHANGE CHUCKS

Swap router bits quickly and easily. Cam-lock design clamps and loosens with a partial turn using a hex key wrench. Much simpler than the original two wrench method. Holds 1/2" shank bits. Order #6400 Router Collet for 1/4" shanks. Replace the factory collet with a Quick Change.

Part Number	Description
9700	All 1/2" Porter-Cable (except #100)
9710	All 1/2" Bosch
9720	Dewalt 625/Elu 1/2" /Festool/Freud
9730	Dewalt 616, 618, 621

9750 - EXTENSION ADAPTER For CNC Carving Machines

PART #9750

Used for light routing and veining on CNC carving machines. Allows deeper reach. Adapter is 1/2" shank. Accepts 1/4" shank bits only. Order Part #9750.

BRASS SET-UP GAUGE BLOCKS

Our Square Gauge Blocks are a quick way to make many easy, accurate set-ups. A great way to make exact depth movements on plunge routers. On table routers, they're perfect for setting distances from the fence to the cutter, or for checking the bit height above the table. Supplied in 1/8", 3/16", 1/4", 3/8", and 1/2" squares. Blocks can be "stacked" to cover a wider range of sizes. A very helpful tool!

Part#	Description
9800	5 pc. Set - 2 1/2" Long
9810	5 pc. Set - 4" Long

BB501 - 5 PIECE BEARING CONVERSION KIT

Use this kit to vary the horizontal cutting depth of router bits with bearing pilots.

Great for stepping in to finish depth by controlled increments.

Contains B2 (3/8"), B3 (1/2"), B7 (5/8"), B8 (3/4") Bearings and 3/32" Hex Key Wrench

BB600 - GENERAL BEARING REPAIR KIT

This handy kit includes spare bearings, screws, and wrench to replace bearings on most bits.

Includes five B3 (1/2 x 3/16) and two B2 (3/8 x 3/16) bearings, ten 54025S Screws, and a 3/32 Hex Key Wrench.

BB701 - ACCESSORY KIT

Great for replacement bearings and screws - Plus this generous bearing assortment allows you to vary your cutting depths and change your profiles. Also contains lock collars and bearings for adding bearing guides to the shanks of your standard bits for following templates.

Contains: 12 bearings – four B3 (1/2 x 3/16), one each of B2 (3/8 x 3/16), B7 (5/8 x 3/16), B8 (3/4 x 3/16), B9 (1/2 x 1/4), B6 (5/8 x 1/4), B4 (3/4 x 1/4), B5 (7/8 x 5/16) and B11 (1 1/8 x 1/2); two each 1/4" lock collars (LC-1/4) and 1/2" lock collars (LC-1/2); one each 1/16, 5/64, 3/32 and 5/32 Hex Key wrenches; plus ten 54025S bearing screws.

BEARING LOCK COLLARS

Retaining Collars used when bearings are added to the shanks of router bits for following templates.

Part Number	Shank Diameter	Outside Diameter
LC-1/4	1/4"	7/16"
LC-1/2	1/2"	1 1/16"

Uses part # HK-1/16 Hex Key Wrench

#LCS-Replacement Set Screw for Lock Collars

HEX KEY WRENCHES

Part Number	Size	Application
HK-1/16	1/16"	Bearing Lock Collars
HK-5/64	5/64"	1/8" I.D. Bearings (3-48 Screw)
* HK-3/32	3/32"	3/16" I.D. Bearings (5-40 Screw)
HK-5/32	5/32"	1/4" I.D. Bearings (10-32 Screw)

* Standard Size for Most Bits

SPARE PARTS LISTING

Socket Head Cap Screws - 10 pc. pack

Part Number	Thread Size	Thread Length	Hex Key Size
34825S	3-48	1/4"	5/64"
54025S	5-40	1/4"	3/32"
103238S	10-32	3/8"	5/32"

Add BLK to part number for 100 pcs.

Flat Washers - 10 pc. pack

Part Number	Inside Diameter	Outside Diameter	Thickness
31250W	5/16"	1/2"	1/16"
5088W	1/2"	7/8"	5/64"

Hex Nuts - 10 pc. pack

Part Number	Thread Size	Width	Hex Size
1032N	10-32	1/4"	3/8"
31224N	5/16-24	1/4"	1/2"
5020N	1/2-20	7/16"	3/4"

Replacement Parts By Tool Number

Replacement Bearing sizes are listed in the catalog with each tool. Most tools with bearing pilots on the end require only the 54025S Screw. Exceptions:

34825S Screw:	2400, 2401, 2404A
103238S Screw	2013-2016, 2410, 2560, 2570, 2575, 2580, 2900-2908, 3390
1032N Nut	RFT5125, RFTD5125, RFT5200
	RFTD5200, UDFT5152
